The University of New England in Armidale, Australia is a unique university, in the enviable position of boasting an excellent international reputation as well as being a leader in research and academic innovation. We aim to foster a constructive and engaged culture where creative ideas and innovation thrive.

The Faculty of Medicine and Health offers courses, training and research opportunities in a full range of scientific and clinical disciplines including Psychology, Health Sciences, Counselling, Health Management, Nursing, Social Work, Medicine and Pharmacy. Our Faculty, staff and students are committed to improving the well-being of individuals, families, communities and populations through diverse programmes, collaborative research and strong community partnerships.

The School of Rural Medicine was established in 2008 and currently comprises about 40 on-campus staff (including clinical and research staff) and significant numbers of medical staff associates with clinical operations throughout the region. The School has alliances with regional, state, national and international education, research and health organisations. The School is responsible for delivering the Joint Medical Program, a partnership between Hunter New England Local Health District, North Sydney Central Coast Local Health District, UoN and UNE, which will deliver quality medical opportunities to regional Australia. The school enrolls up to 300 JMP students with 60 students in each year level. The School manages the Anatomy Laboratory which operates the UNE Body Donor Program and provides cadaver material for teaching and research purposes.

### **About the role**

The Anatomy Lab Manager will be responsible for the operational and technical support of the Anatomy Laboratory facility and bring to the facility a broader range of programs and users across medicine, allied health professions and clinical scientists. You will manage the technical requirements of the body donor program and associated procedures. Other key duties will include organisation of the day to day running and maintenance of the laboratory including supervision and training of students, staff and other users of the anatomy laboratory.

### **Skills & Experience**

You will be experienced in working in an anatomy laboratory with skills in dissection of cadaveric material with relevant experience and applied knowledge WH&S guidelines and legislative requirements. In addition you will have excellent communication skills with the ability to work both independently and collectively with a wide range of professional, academic and clinical staff.

### **Additional information**

To discuss this role please contact Professor Geetha Ranmuthugala, Interim Head of School: phone 02 6773 3678 or email [granmuth@une.edu.au](mailto:granmuth@une.edu.au) To find out more about the School of Rural Medicine visit <http://www.une.edu.au/rural-medicine>

**Closing Date:** Midnight, 4 March 2018

**Reference No:** 218031

**To demonstrate your suitability for this role, please respond to the selection criteria in your application.**
